

**A Notice from the Texas Department of Transportation:**

To switch from the current Central Permitting System (CPS) to the new Texas Permitting & Routing Optimization System (TxPROS), the Motor Carrier Division will:

- Shutdown the Central Permit System at 6 p.m., Friday, August 26. All applications submitted through CPS by 6 p.m. Friday will be issued before TxPROS goes live on Monday
- Not accept any phone applications on Saturday, August 27
- Process fax applications received after 6 p.m., Friday, August 26 on Monday, August 29

TxPROS will remain offline until 6 a.m. on Monday, August 29. After 6 a.m. that day, you can access TxPROS using your current CPS login and password.

Customer account information and escrow account funds will be transferred from CPS to your TxPROS account.

TxPROS will allow you to manage your company's account information. You are encouraged to "clean-up" your account in TxPROS. Please add missing information and update addresses, phone numbers and email addresses. Adding an email address to your account will allow the Motor Carrier Division to send you important information related to oversize/overweight permits and the motor carrier industry.

For additional information on the conversion, contact TxDOT's Motor Carrier Division by phone at 800-299-1700 (options 1-5-2) or by email [MCD-RESPOND@TXDOT.GOV](mailto:MCD-RESPOND@TXDOT.GOV)
